Code-Layout, Readability and Reusability

Date	29 September 2026
Team ID	SWTID-2026-6564
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	Script steps use 4-space indentation.
2	Proper File Structure	Files and folders are logically organized	Yes	All items live in one application scope and share a common name prefix, so they are easy to find.
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Names such as matchedRule and categoryName are used.
4	Function / Method Names	Functions are descriptively named	Yes	Flow and action names state what they do, e.g. Set Category from Keywords.
5	Code Comments	Inline and block comments explain logic	Yes	Script steps and flow descriptions explain each decision.
6	Modular Design	Code is split into reusable functions/modules	Yes	Keyword matching is a separate action reused for category and priority.
7	No Redundant Code	Duplicate or unused code is removed	Yes	Keywords live in the rules table instead of repeated conditions.
8	Error Handling	Exceptions and errors are handled gracefully	Yes	Script steps use try/catch and unmatched or failed tickets go to the triage queue.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Keyword Match Action	Flow Designer action / JavaScript	Category and priority steps; can be reused for Request or Change tickets	High
2	Classification Rules Table	ServiceNow custom table	Category, subcategory, priority and reporting	High
3	Category-to-Group Mapping	ServiceNow table	Assignment step and group reports	Medium
4	Notification Templates	ServiceNow email notifications	Caller and group notices; other ticket flows	Medium
5	Work Note Logging Step	Flow Designer action	Every classification step in the flow	Medium

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	4	Single scoped application with consistent names.
Readability	4	Clear names and comments; flow steps read in order.
Reusability	4	Rules and matching action shared across steps.
Documentation / Comments	4	Comments in scripts and descriptions on flow steps.
Overall Score	**4.0**	Well organised and easy to maintain.
